RESUME

ABOUT ME :

Information Technology student skilled in C++, Java, Python, and full-stack web development with React and modern databases. Passionate about building innovative projects including AI-based systems and web applications. Strong interest in artificial intelligence, software development, and creating impactful technology solutions.

🚀 Projects

- **Real-Time Ambient Music Generator**
  Developed an AI-based system that generates ambient music in real time based on user input.
  Implemented algorithms to dynamically create music patterns and sound textures.
- **Online Restaurant Website**
  Built a responsive restaurant web application using React and database integration.
  Implemented menu display, ordering interface, and responsive UI.
- **AI Agent**
  Developed an AI agent capable of performing automated tasks and responding to user queries.
  Integrated backend logic and APIs to simulate intelligent behavior.
- **Additional Projects**
  Worked on small web and programming projects to strengthen full-stack development skills.

📌 Interests

- Artificial Intelligence
- Full Stack Development
- Building Creative Tech Projects

💻 Technical Skills

Programming Languages:
C++, Java, Python
Web Development:
React.js, HTML, CSS, JavaScript
Databases:
MongoDB, MySQL, PostgreSQL
Tools & Technologies:
Git, GitHub, Figma

🧠 Relevant Coursework

- Data Structures & Algorithms
- Database Management Systems
- Object-Oriented Programming
- Web Development
